

International Workshop
**Social Innovation in Long-Term Care
through Digitalization**

LTC-2021

November 2-4, 2021. Università Politecnica delle Marche, Ancona, Italy
Facoltà di Ingegneria, via Breccie Bianche, Faculty Club

One of the problems that during the COVID-19 pandemia must be faced is the reorganization of long term care. The participants will present their process innovations in long term care through digitalization. Innovative approaches will be elaborated in cross-national working groups and with the involvement of young scientists. The workshop is free of charge. The workshop is both in person and virtual participation (link to the teams group is in the following website).
